Sequence diagram with the following participants (left to right): "Data Source Identification", "Data Importing", "Data Validation", "Data Processing", "PDF Generation", "Logging", "User Feedback Loop", "Continuous Improvement".

Messages:
- "Data Importing" → "Data Source Identification": JSON files, Databases, User input
- "Data Validation" → "Data Importing": File reading functions, Database connections
- "Data Processing" → "Data Validation": Data type checks, Mandatory field checks
- "PDF Generation" → "Data Processing": Apply business logic
- "Logging" → "PDF Generation": Fill PDF forms, Label PDFs
- "User Feedback Loop" → "Logging": Generate logs, Track errors
- "Continuous Improvement" → "User Feedback Loop": Feedback for improvements
- "Data Processing" ⇠ (dashed): Update logic, Refine questions
- "Data Validation" ⇠ (dashed): Enhance data checks
- "Data Importing" ⇠ (dashed): Improve data importing methods
- "Data Source Identification" ⇠ (dashed): Identify new data sources
